GIORGIO GRAESAN

and Friends

La sensazione lussuosa di un Muro ricoperto di pura Seta con la sua magica lucentezza
e il contrasto dei suoi Filidi Opachi in 169 Colori.

La sua natura filante aiuta a nascondere eventuali imperfezioni dei muri.

Offre una buona lavabilità ma può essere ulteriormente protetto con Vetro Lucido o
Opaco per una Garanzia di Lavaggio Integrale.

È un rivestimento a base di Resine acriliche e Sabbie Naturali.

Si stende con il nostro pennello in una mano. Se si desidera una maggiore quantità di
“fili” può essere applicata una seconda mano di FilidiSeta.

1. Applicazione Primus Sabbia

2. Colorare FilidiSeta

3. Miscelare bene il prodotto

4. Distribuire il prodotto in parete in
senso verticale per mantenere e diseg-
nare l'effetto filante di FilidiSeta

5. Se lo desiderate, dopo alcune
ore a parete asciutta applicare una
seconda mano per rendere l'effetto
più pieno ed omogeneo mantenendo
il senso verticale della applicazione e
disegnare FilidiSeta sulla parete

6. Lasciare asciugare
