

AG Design

~Fototapet Vertical~

Imprimarea fototapetelor se face pe hartie speciala folosind tehnologia offset si utilizand pigmenti care asigura stabilitatea culorilor.

Producerea in format mare a elementelor componente asigura reducerea numarului de imbinari si a timpului de instalare. Datorita tehnologiei folosite de AG Design, un fototapet cu dimensiunea de 360x254 cm este format din 4 piese.

Varietatea modelelor permite atat decorarea camerelor de locuit cat si a spatiilor publice.

Imaginile fototapetelor prezentate sunt alese astfel incat sa permita aplicarea si pe suprafete mai mici fara a se pierde tema acestora.
