

Agrest

Polyamide carpet, known for its durability, can be used in any room. One of the most important advantages is the fact that the carpet fibers can stand up to a lot of wear and tear. This makes the use of nylon carpeting especially practical in areas where there is a lot of foot traffic since the synthetic fibers hold their shape longer than many other types of fibers. As a result, the pile of the polyamide carpeting looks new and fresh for many more years than other carpeting selections.

Jaudon

A beautiful woven Wilton two-tone loop pile, Jaudon makes the most of Lano's in-house three-ply yarn in a resilient wool-rich blend of 80% wool-20% polyamide for the best in durability and appearance retention (Class 32).

Exceptional clarity of design is achieved thanks to the preciseness of Wilton weaving and the definition afforded by the three-ply yarn, the result more beautiful and intricate patterned carpets.

With great dimensional stability, important for areas subject to wheeled traffic and castor chairs or where frequent maintenance takes place, Jaudon avoids delimitation and has a natural ability to contribute to cleaner air by absorbing pollutants and regulating humidity. Jaudon is 100% mothproof.

Pointland

An Axminster carpet is by far the most practical floorcovering available today, boasting performance qualities that include durability, strength, appearance retention, cleanability, safety and comfort. Our Axminster qualities are woven on a state-of-the-art loom equipped with the latest technology. We can produce the most complex of carpets without compromising on versatility, flexibility and service. The special weaving process where the pile and the backing materials are woven together in a single operation ensures a dense, durable and extremely strong carpet especially designed to withstand the wear and tear of high traffic areas. With Class 33 Heavy Commercial ratings and Bfl flammability rated, our Walk of Fame Axminster carpet qualities offer complete peace of mind in even the busiest of environments. As well as our diverse standard collection of styles, we also have a bespoke service that allows our customers to let their imaginations run wild and create their very own beautiful Axminster carpet designs.

Wooltouch

Wooltouch and Woolclass are high quality tufted carpets made from pure new wool that will withstand use in both residential and contract (class 32 - 33) applications.

RESILIENT Wool is resilient making it hard wearing and long lasting. Retaining pile height and shape, wool recovers quickly from furniture compression and resists permanent marking, as well as being flame resistant.

COMFORTABLE Wool is naturally comfortable, providing thermal and acoustic insulation, it also regulates air moisture content, absorbs contaminants from indoor air and reduces static charge.

EASY Wool is easy to care for meaning that the carpet will resist dirt and stains.

RENEWABLE Wool is biodegradable and from a renewable source.

Zen Design Barock

Polyamide carpet, known for its durability, can be used in any room. One of the most important advantages is the fact that the carpet fibers can stand up to a lot of wear and tear. This makes the use of nylon carpeting especially practical in areas where there is a lot of foot traffic since the synthetic fibers hold their shape longer than many other types of fibers. As a result, the pile of the polyamide carpeting looks new and fresh for many more years than other carpeting selections.
